KeyMacro allows you to create macros in the same way you do it on your keyboard. In a way, it is a powerful keyboard extension. Its ability to extend macros beyond the keyboard is one of its most prominent features. Another key feature is its ability to quickly and easily extend macros from one program to another. With KeyMacro, users can create macros and assign them to shortcuts easily and quickly. It is also a useful tool to assign and control macros with a mouse, as it works with all the programs you are used to. Supports all the features and shortcuts that a standard keyboard macro can do. Quickly and easily extend macros from one program to another. Works with all the programs you are used to. Includes a built-in macro manager to help you control and assign your macros. Additional features: Automatically activates the app when you press a certain key sequence. Creates a systemwide copy of the macro, so it won't overwrite your original if you change the name or the text. Hide the original macro from the menu, so you don't accidentally activate it when you are creating a new one. Allows you to use the same macro in more than one application, and to copy the same macro to more than one location. Assign the macro to keys of your choice. You can also create a macro that requires input. Simplifies your work and gives you more time for creative endeavors.
