When people hear about how important art and design is for artists, they're likely to scoff and say that they wouldn't work in such a nerdy field. Odds are it isn't the field, it's that they're self-conscious about it. Have you ever thought about how much time you spend editing your pictures? The better you get at your work, the fewer mistakes you'll make and the fewer "firsts" get captured. Photoshop has some photo-editing pitfalls, and a strong sense of self-worth is more than a good thing - it's necessary (and will make you a better and more confident person). A lot of photo-editing tasks don't get done in Photoshop because they're so annoying. However, a lot of photo-editing tasks don't get done in Photoshop because they're so annoying. As an editor, you have a lot of control over the appearance of your photo, and while some may argue that they're the best way to make it look really professional, other methods are even better. If there are frames, layers, transparency, or other elements that can be improved, it's often the easiest way to get there. Sometimes, by separating that from the rest of the photo, you can get more good from a less scary task. This one may be hard for some, but if you're serious about getting better at Photoshop, it's a necessity. Google is your friend, and there are tutorials galore out there. Just type in something as specific as airplane editing or as general as color correction, and you'll find a wealth of information.
